

UNDERGRADUATE THESIS OUTLINE

FORM A

Dear Sir/Madam,
I, the undersigned :

Name : Marsia Br Pelawi
Student ID No. : 220502068
Study Program : S1 Manajemen Reguler
Major : Management
Research Title : Marketing Strategy Analysis of Nasi Gerilya Restaurant on the GrabFood Platform Using the SWOT Matrix

Would like to submit an undergraduate thesis outline as follows:

Background	Digital marketing has changed competition in the culinary business, especially through online food delivery platforms such as GrabFood. Nasi Gerilya Restaurant shows strong digital performance, reflected in its 4.7/5.0 rating and 4,187 reviews, but it still faces several problems such as inconsistent taste, incomplete orders, unavailable menu items still appearing on the app, and price competition from similar merchants. Therefore, a marketing strategy analysis is needed by examining both internal and external business factors through the SWOT matrix.
Research Objectives	1. To identify the internal factors of Nasi Gerilya Restaurant on the GrabFood platform, including its strengths and weaknesses. 2. To identify the external factors, including opportunities and threats. 3. To formulate the marketing strategy of Nasi Gerilya Restaurant on the GrabFood platform based on SWOT matrix analysis.
Main Theory	The main theory used in this study is SWOT analysis, which is a framework for identifying strengths, weaknesses, opportunities, and threats as the basis for formulating marketing strategies. Supporting theories include marketing strategy, STP and marketing mix, digital marketing, and consumer behavior in online food delivery platforms.
Identification of the Variables (if applicable)	This study does not use variables in the quantitative sense because it applies a descriptive qualitative approach. Instead, the study focuses on marketing strategy, internal business factors, external business factors, and strategy formulation through SWOT.
Research Design	This study uses a qualitative approach with a descriptive research design. The data are collected through interviews,

	observation, documentation, and literature study, then analyzed through data reduction, data display, identification of internal and external factors, SWOT matrix formulation, and conclusion drawing.
Research Hypohotesis (if applicable)	This study does not use a hypothesis because it is descriptive qualitative research and does not test statistical relationships between variables.
Research Sampling	The sampling technique used in this study is purposive sampling, in which informants are selected intentionally based on their relevance to the research focus. The informants include the owner as the key informant, admin staff or employees as supporting informants, and GrabFood customers as additional informants.
